

Extended high-quality grazing, diploid density, and persistence through reseeding promotion.

- Quality and persistence under set stock grazing
- Emergency forage, spring or fall sown
- Diploid drought and cold persistence
- Promotion as a reseeding biennial

SUPERIOR RYEGRASS MIX	
CULTIVAR	LB/AC
CRUSADER ITALIAN RYEGRASS	5
OHAI PERENNIAL RYEGRASS	10
TOTAL	15

Crusader Italian Ryegrass is a dense, fast growing, high quality ryegrass for forage and hay production. A low cost alternative to annuals or tetraploids, Crusader will persist longer in hot, dry climates. When fall planted it will grow through the winter into spring for extended grazing and silage production. Crusader Italian Ryegrass flourishes in a single stand, is a great addition to spring interseed mixes with herbs and clover, or can be overseeded with perennial grasses in late summer or fall. Plant along side alfalfa to extend the stand.

Seeding Rate: 12 lb/ac; Mix 5lb/ac **Planting Time:** Mar-Aug **Regions:** All **First Grazing:** 60 days
