

A perennial herb that produces high Total Digestible Nutrients for grazing and nutrient cycling for soil health.

- Preferentially grazed
- Quick to establish, persistent
- Drought tolerant and winter hardy
- Excellent low growing ground cover
- Nitrate scavenger
- Both fibrous root and taproot

Late Summer Mix for Finishing Lamb	
CULTIVAR	LB/AC
Tonic Plantain	2
Hunter Leaf Turnip	2
Graza Radish	5
Choice Chicory	1
Red Clover	2
Persian Clover	1
TOTAL	13

Known as a forage herb, Tonic Plantain adds another dimension to the pasture sward. Tonic grows upright for bigger bites and is very palatable. With both a fibrous root and taproot it cycles macro and micro elements into a green carbon food source. The flexibility of Tonic allows it to make a marked difference to the overall dry matter production of most grazing systems by providing extra highly digestible feed during transitioning seasonal periods.

Seeding Rate: 7 lb/ac, Mix 1-2 lb/ac Planting Time: Mar-Sept Regions: All First Grazing: 60 days
