TOTAL	40

Winfred forage brassica is a cross between a turnip and kale, termed "rape". This brassica requires only 6" of in-crop water to produce up to five tons of dry matter per acre. Both excellent drought and frost tolerance, this rape is suitable for grazing in summer and winter. With strong regrowth, Winfred has the ability to be grazed up to three times a season and is productive in a wide range of soil fertility and environmental conditions.

Seeding Rate: 3-4 lb/ac; Mix 1-2 lb/ac **Planting Time:** Apr-Sept **Regions:** All **First Grazing:** 90 days
